

Seasat A/S selected by Maersk Supply Service to deliver global maritime connectivity services for Maersk Supply Service vessels

Copenhagen, 10 September 2014 — Seasat A/S, the Danish communications services provider, specialised in delivering reliable broadband, television and voice services for the maritime market announces it has concluded a multi-year contract with Maersk Supply Service. The contract covers the delivery of 60+ VSAT systems with broadband airtime from Eutelsat and SpeedCast and is based on SAILOR 900 antennas from Cobham SATCOM. The contract runs for 36 months - Seasat A/S will install and commission the systems as well as provide service and support to the vessels.

With this service setup, Maersk Supply Service will be able to enhance crew welfare and ship to shore connectivity in a global footprint.

Maersk Supply Service vessels will benefit from Eutelsat's maritime connectivity services using SAILOR 900B VSAT antennas produced by Cobham that will be deployed and maintained by SEASAT. Using resources on four Eutelsat satellites Maersk Supply Service will be able to enhance crew welfare and ship to shore connectivity in a footprint extending from the Gulf of Mexico to South-East Asia.

Peter Faurhoej, Head of Navcom Systems at Maersk Supply Service, said: *"Increasing charter and crew demand for fast and reliable internet require high quality equipment, a proven satellite provider and second to none service support. This additional multiyear contract with SEASAT and Eutelsat will address our growing needs for reliable and cost effective communications services onboard our vessels. We are very satisfied with the tailor made setup, we have developed together with Seasat, and we are sure that our crew members and charters will be satisfied too."*

Olivier Risse, Director of mobile services at Eutelsat, added: *"This contract is further evidence of how our newly expanded satellite footprint is benefiting the maritime sector that has high expectations for reach, dependability and cost-effective connectivity. We are proud that Maersk Supply Service and SEASAT continue to place their trust in us and that our Ku-band-based solutions are increasingly proving their value for crew welfare and ship to shore connectivity."*

"SpeedCast is pleased to support our long-term partner Seasat for this opportunity with Maersk Supply Service," said Pierre-Jean Beylier, CEO of SpeedCast. *"Seasat has proven that they can handle large-scale projects effectively and reliability. Similarly SpeedCast has built a highly reliable and resilient maritime network to meet the needs of the most demanding customers, such as Maersk Supply Service."*

Kim Martinsen, Chief Executive Officer of SEASAT, concluded: *“This agreement with Eutelsat enables us to step up our collaboration with Maersk Supply Service with operations all over the world. Thanks to Eutelsat’s global satellite coverage and flexible solutions for maritime service providers, we can offer our expertise in the maritime sector to multiple markets, notably for maintenance and support services where our experience is particularly acknowledged.”*

About Seasat A/S

Seasat A/S is a Danish company, operating primarily in the Danish market since 2004 and based in Køge, south of Copenhagen. Seasat delivers complete VSAT solutions, with over 400 installations. Seasat strives to give our customers the best possible support - it a trademark of the company, which strives to be the best – not the biggest. Seasat specializes in providing internet access to the ship and crew, as well as voice services. SeaSat works with top-tier providers such as SpeedCast for Ku-band services and Iridium for L-band services. For more information, visit www.seasat.dk.
